

Helpful Hints for Using Shrink Film

Place Shrink Film between 2 sheets of vellum when baking. If you are shrinking pieces larger than 2" long, consider covering the shrink film with 2 sheets of vellum to minimize curling.

Bake 2 - 3 pieces at a time.

Do not bake Shrink Film on stoneware, metal is best.

If your Shrink Film curls, remove it from the oven, flatten with a spatula and reheat to complete the shrinking process.

All ovens vary. Consider testing Shrink Film with some scraps before shrinking your final pieces.

The larger a Shrink Film piece starts, the harder it is to shrink consistently without curling.

You may design your Shrink Film with permanent markers, paint pens and rubber stamps before *and* after baking.

Rolling a drinking glass over Shrink Film is a great way to flatten it after baking!

Use caution when handling Shrink Film, pieces will be HOT.
