

"Suggested By a Wing" by Cheryl Holz

Clear Dura-Lar

An ultra clear, glossy film with exceptional strength and stability.

Use a 3D pen or ink for an outline and fill with paint for a three dimensional look.

Add Mica powder to paint to create sparkle that will not dilute on the non-absorbent surface.

Create vibrant animations using permanent ink, Cel Vinyl or cartoon paint on the back of the film.

- With several colors on the surface, use a cotton pad soaked with alcohol ink medium to move and blend the inks together.
- Experiment with abstract art by pressing paint between two sheets of Dura-Lar.
- Produce unique background tones by placing various colored papers behind artwork.
