

Grafix Chipboard and Computer Grafix Sticker Box

Designed by: Kay Molyneux

Make your own flip box with Grafix black Chipboard and Computer Grafix Film to store your planner or journal stickers. This box would also make a great gift for friends and family!

Supplies:

Computer Grafix Matte Adhesive-Backed Film
Computer Grafix Clear Adhesive-Backed Film
Grafix Black Chipboard
Grafix Artist-tac
Grafix Double Tack Mounting Film
2 Small Flat Magnets
4"x6" Colored Card Panels
Bright Colored Die Cut Banner Shape
Sharp Craft Knife
Computer/Laptop with Compatible Ink Jet Printer
Alphabet Dies with a Compatible Die-Cutting Machine
3-D Card, CD storage & Die storage Sizzix die (662359)
White Embossing Powder
Craft Heat Tool

Directions:

1. Cut three of the 3-Die from the black Chipboard and trim each with a craft knife, smooth any rough edges with a fine sandpaper. (You can use a die or a plate to achieve the curve look).
2. Fold and crease the score-lines.
3. Adhere the magnet onto the inside of the front panel with a Double Tack Mounting Film. You can cover the magnet with a strip of washi tape.
4. Then make up the box by adhering the tabs with Double Tack Mounting Film.
5. Fold the colored banner in half and adhere together with the magnet inside.
6. Then add Double Tack Mounting Film to one side, put the lid of the box in the closed position and carefully position over the magnet on the box, the magnets will 'lock' together. Press to form a bond.
7. Adhere Artist-tac to the colored card panels and attach the backing sheets to them with the non-stick surface face up. (Trim as necessary).
8. On your computer add non-copyright shapes, icons, sentiments, and ClipArt onto an A4 page. Print out onto the Computer Grafix Adhesive-Backed Film following the pack instructions. Cut out individual items to make stickers, peel the liner off, and place onto the non-stick card sheets.
