

Chess Set Card

Designed by: Kay Molyneux

A simple and impressive card creation using Distress Oxides and stamps on Graftix Opaque White Craft Plastic Film.

Supplies:

Graftix Opaque White Craft Plastic Film
Graftix Artist-tac
A6 White Card Blank
Stamp with a Chess theme on an Acrylic Block
Versa Fine Clair Black Ink Pad
Clear Embossing Powder
Craft Heat Tool
Paint Brush
Distress Oxide Ink Pads (Ranger)
Blending Sponges
Gold Luscious (Indigo Blue) or Other Mica Powder
Die Cut Sentiment

Directions:

1. Cut the Graftix Opaque White Craft Plastic to fit an A6 card with a 1/8" border.
2. Dust the Opaque White Craft Plastic Sheet with the antistatic bag.
3. Then using the Versa Fine Clair ink pad, stamp the image just below the center, onto it.
4. Apply the clear embossing powder, remove the excess and heat set, don't overheat or the plastic sheet will distort.
5. Lightly sponge the Distress Oxide inks over the stamped image.
6. With a slightly damp paintbrush remove areas of ink within the image.
7. Put a little of a darker shade of Distress Oxide Ink on a glass mat and pick up the color with a paint brush and paint in some of the chess pieces. Then mix a little Gold Luscious with water and add highlights and splatters to the stamped panel and die cut sentiment.
8. Edge the panel with black ink and adhere to the front of the card blank with Graftix Artist-tac and attach the die cut sentiment.
