

Quick Cards

Designed by: Kay Molyneux

A quick and easy way to make two cards from a sheet of Matte Computer Grafix with sentiments.

Supplies:

Matte Computer Grafix
Grafix Double Tack Mounting Film
Grafix Artist-tac
Two 7x5 White Card Blanks
Alcohol Pens (Promarkers, Copic)
Colored Cardstock
Black Card Base
Computer
Printer
Copy Paper
Self-Adhesive Pearls and Ribbons

Directions:

1. Open a new document within a word-processing program, choose 2 silhouette images from clip art and insert into the document with enough space so they can be cut out.
2. Then select two suitable sentiments to go with each image.
3. Print out the images and sentiments onto a sheet of Matte Computer Grafix. *(Note: Adjust your printer settings to print on semi-glossy photo paper, for an optimal print).*
4. Cut out each image and add color with the Alcohol Pens onto the reverse side.
5. Cut out each sentiment.
6. Apply Grafix Artist-tac to the reverse sides of the sentiments and images, and then mount onto white copy paper.
7. Take the images and sentiments and mount them onto the black card, leaving an even narrow border around the edges.
8. For each card, cut a sheet of colored cardstock to fit the front of the card blank with a narrow border then mount with Grafix Double Tack Mounting Film.
9. Adhere to the card blank and then add the images and sentiments.
10. To finish, add self-adhesive pearls and ribbon.
