

Metallic Shrinkable Holiday Brooch

Designed by: Rebecca Goodwin

Bring in some cheer for yourself or your loved ones with a handmade metallic shrinkable holiday brooch with Graftix Metallic Shrink Film.

Supplies

Graftix Metallic Shrink Film
Fine Grit Sandpaper
White Colored Pencil
Permanent Marker/Archival Ink Pen
Scissors
Clear Dimensional Gloss Medium
Pin Back Bar with Clasp
Glue/Adhesive

Directions

1. Lightly rub the sandpaper in two directions across Graftix Metallic Shrink Film. This will allow the colored pencil to adhere to the surface.
2. With a permanent marker or pen, draw or trace a frame approximately twice the size you'd like your finished brooch to be. (If you would like a brooch that is two inches high, draw the frame approximately four inches high, etc.)
3. Color in the center of the frame with the white colored pencil.
4. Draw or trace a fun character or scenery on the white area inside the frame, like a bear.
5. Bake the Shrink Film brooch according to package instructions.
6. After the film has cooled, apply a coat of clear dimensional medium or gloss sealer for shine and protection. Set aside and leave undisturbed for several hours to dry.
7. Use a strong adhesive to attach a pin back to the back of the brooch.
