

Shrink Keychain

Designed by: Maritza Garcia

DIY your own custom shrink keychain using Graftix Shrink Film!

Supplies:

Graftix Matte Shrink Film
Graftix Clear Shrink Film
Graftix Metallic Shrink Film
Keychains
Permanent Color Markers
Hole Punch
Craft Scissors
Oven
Optional: Cutting Machine

Directions:

1. Take a sheet of Graftix Shrink Film (your choice of which type) and free-hand draw or trace a shape or design.
2. Next, using your favorite craft scissors cut out your shape/design or if you have a cutting machine you can run it through your cutting machine. (Using a cutting machine is optional).
3. Once all of your pieces are cut out. Fill in your shape/ design with color using your permanent markers.
4. Then set aside and let the ink dry.
5. Next, hole punch your cut-outs before baking/ shrink your designs.
6. Pre-heat your oven and follow the Shrink Film baking instructions for the best results.
7. Once the Shrink Film is out of the oven, let the cut-outs cool.
8. Then take a keychain and attached the Shrink Film shape/design and include any additional embellishments to finish off your keychain.
