

Grungy Metallic Foil Card

Designed by: Tania Ahmed

Elevate your card creations by creating a Grungy Metallic Foil Card using Graftix Metallic Foil Board and Shrink Film.

Supplies:

Graftix Metallic Foil Board
Graftix Clear Shrink Film
Butterfly Die or Punch
Twine
Sentiment Stickers
Embossing Folder
Die Cutting Machine/Scissors
Black Acrylic Paint
Blue/Teal Acrylic Paint
Paintbrush
Heat Tool/Oven
Rubber Stamp
Embossing Ink
Silver Embossing Powder
Clear Drying Glue
Black Card Blank
Paper Towel

Directions:

1. Start by cutting Graftix Metallic Foil Board into 4" x 5.25" rectangle.
2. Next, dry emboss by using an embossing folder and a die-cutting machine.
3. Apply black acrylic paint with a brush to the sheet. Before the paint dries, wipe some of it off lightly with a paper towel. (This will give the appearance of brushed metal).
4. Let the first layer dry completely, apply a second color of acrylic paint, and repeat the above process.
5. Once the sheet is dry, buff along the high points of the embossing to reveal the metallic foil underneath.
6. Then cut Graftix Clear Shrink Film using a butterfly die or trace and cut out a butterfly with scissors.
7. Shrink the film in an oven or use a heat tool. Follow the Shrinking instructions on the back of the package.
8. Apply embossing ink to stamp and stamp the shrunken butterfly. Liberally sprinkle with embossing powder, tap off excess powder, and heat the powder.
9. Use a butterfly punch on the foil board and attach it to the shrink film butterfly with clear drying glue.
10. Loop twine around the dry embossed foil board piece a few times and secure behind with tape.
11. To finish off the card, attach to the black A2 card blank, add a sentiment sticker, and attach butterfly embellishment with glue.
