Halloween Cake Topper

Designed by: Maritza Garcia

Trick out your Treats with these awesome cake toppers using Grafix InkJet Shrink Film

Supplies:
Grafix Ink Jet Shrink Film
Printer
Oven
Baking Tray
Parchment Paper
Weighted Coaster, Plate, or Pot to flatten shrink film
Lollipop Sticks
Glue Gun

Directions:
Step 1
Choose an image to print onto your Grafix Ink Jet Shrink Film sheet.

Step 2
Cut out design, and place it onto a baking tray, ensure the baking tray is lined with parchment paper to protect your baking tray from any shrink film residue.

Step 3
Next. Preheat your oven to the recommended temperature of 300-350 °F (149-177 °C). Bake shrink film for 2-3 minutes.

Step 4
Immediately upon removing shrink film from the oven, weigh down with a heavily weighted coaster, plate, or pot to help flatten any curled edges. NOTE: Film may not always shrink perfectly, allow for some distortion. Once your pieces have cooled, set them aside.

Step 5

Preheat glue gun. Cut down lollipop sticks to the desired length. Once glue gun is heated, gather shrink film pieces and start assembling topper(s).

Step 6

Add toppers to cakes, cupcakes, or to any solid dessert of your choice. Enjoy!
