Step 3. Take a sheet of Grafix Craft Plastic in Crystal Clear, for this part you may want to use either a dry-erase marker or permanent marker to trace out your tag shapes, only this time you will cut your tag shapes a bit larger than your first two tag sets to create a nesting pattern. Note: I traced my tags with a dry-erase marker and wiped off my lines.

Step 4. Gather all your tag shapes and begin layering your sets. When you have each tag set in place, hole punch through all three layers all at once to ensure all holes are perfectly centered.

Step 5. Now that you have all your tags punched out start adding ribbons and any other embellishments. After this, you are ready to start using your custom tags.
