

Opaque White Craft Plastic Birthday Card

Designed by: Lolly Palooza

Learn to make these sophisticated cards perfect for the next Birthday celebration using Grafix materials!

Supplies:

- Grafix Craft Plastic Opaque White, 3 3/4" x 5"
- Grafix Chipboard, Black, 4 1/4" x 5 1/2"
- Grafix Double Tack Adhesive, four 1/2" squares
- Grafix Frisket Film, 3/4" x 3" strip
- OLO Alcohol Markers, chisel tip:
 - B2.4, YG 2.5, O 2.2, RV 0.2
- Stazon Ink, black
- Sharpie or another permanent marker
- Rubber stamp sentiment
- Gold DecoColor marker

Directions:

1. With the Grafix Opaque White Craft Plastic card panel oriented horizontally.
2. Peel and place the Grafix Frisket Film strip with the bottom about 1 1/4" above the bottom of the Craft Plastic, and centered left to right.
3. With the OLO alcohol markers, draw four candles, one in each color, vertically on the card so that the tops and bottoms of the candles protrude beyond the Frisket Film. It's best to draw from the Frisket tape outward rather than toward the Frisket Film, as alcohol ink can pool around the film.
4. Using a Sharpie or permanent marker, doodle designs in each candle and add a black line for a wick above each candle.
5. Using the gold DecoColor marker, draw a flame above each wick.
6. Peel the Frisket Film and stamp the sentiment in the masked area.
7. Use the gold marker to also edge the black chipboard creating a gold frame look.
8. Peel the four squares of Grafix Double Tack Adhesive and place one in each corner on the back of the Opaque White Craft Plastic. Peel the backing off and adhere this to the gold-framed chipboard.
