Heat to shrink

tips & tricks

Inkjet Printable

Inkjet Shrink Film

Designs shrink to 20 % of the original size creating durable charms. Great for adding dimension and creating mini art. Easy to cut with decorative scissors, die-cut machines, and punches. Use your computer and inkjet printer to create personalized Shrink art.

Scan original artwork
and print

Shrink using a heat tool, toaster oven, mini pancake press or traditional oven.

Finish with frosted shimmer spray to add sparkle.

- Print one side. Once dry, print a mirror image on the back for double sided art.
- Use the same stamped or stenciled image to create matching focal point in a project.
- Finish with UV resin or gel medium and add inclusions.
- Print an image, cut as square or circle to create tiles.
